HEALTH PLANS

### Three-tier Preferred Drug List effective January 1, 2016

This preferred drug list was developed by the Community First Health Plans (CFHP) Pharmacy and Therapeutics (P&T) Committee to ensure you receive cost-effective pharmaceutical care, emphasizing quality and safety. The P&T Committee is made up of CFHP physicians and other health care providers. Using this list will allow CFHP to keep its prescription benefits affordable for you. While you still will be able to receive any medication your physician chooses to prescribe for you, medications not listed below may not be covered or may require a higher co-pay. Information about prior authorization requirements or limitations for certain medications is available to Prescribers via the Navitus Web Portal.

**All generics are considered preferred and are shown in lower case. Preferred brand name drugs are shown in all caps. If you choose to get a brand name product when a generic equivalent is available, you will be responsible for the generic co-pay plus the price differential between the generic and the brand name.**

### Maintenance drugs are coded as such if they meet the following criteria:

1. Medications that do not require frequent monitoring and dosage adjustments for side effects or therapeutic responses. Certain drugs that may have potential life-threatening toxicity when taken as an intentional overdose may be excluded.
2. Medications that are used to treat a chronic condition with no therapy endpoint. These drugs are taken continuously, but do not provide a cure for the condition for which it is being treated.
3. Medications that are typically used as outpatient type of drugs.
